

BloodTrack® Emerge

The world's most advanced blood management system

Control Access to Blood Units in the ER

Benefits

- Secures unlocked fridges in the ER, ECMO, or L&D with magnetic locks
- Controls access to emergency-use blood (OPos and ONeg)
- Records blood units removed
- Records patient ID against each blood unit removed (optional)
- Records staff name against each blood unit removed
- Displays fridge inventory via dashboard in blood bank
- Warns of low inventory levels via dashboard in blood bank
- Records staff who access fridge (remove, return blood)
- Warns if blood returned after 30 mins (audible and visual alerts for ER and blood bank staff)
- Quarantines blood if returned after 30 mins
- Checks for blood beyond expiration date
- Generates reports on emergency blood usage (staff, unit, patient, time)
- Does NOT require an interface

Includes

- Easy-to-use touch screen kiosk with barcode scanner
- Magnetic locks for new or existing refrigerator
- Award Winning BloodTrack software (Manager, Database, Services)
- Implementation and Training (3.5 days)
- Database backup service

Optional Upgrades

- Temperature monitoring in realtime
- Staff PIN authentication
- Inventory dashboard for ER staff
- Recording of blood unit final disposition
- Small counter-top refrigerator
- E-learning training course
- Custom validation scripts
- Crossmatched blood management
- Interface to blood bank computer system or LIS
